## **DETAILED ACTION**

1. Claims 1 and 3-14 are pending in the following action.

### ***Response to Arguments***

2. Applicant's arguments, see pages 7-11 of the Applicant's Amendment, filed 12 September 2005, with respect to rejections of Claims 1-12 under 35 U.S.C. 103(a) have been fully considered and are persuasive. The rejection under 35 U.S.C. 103(a) of Claims 1-12 has been withdrawn.

## **REASONS FOR ALLOWANCE**

3. The following is an examiner's statement of reasons for allowance:

4. In light of the Applicant's arguments filed on 12 September 2005, Claim 1 is considered allowable, particularly due to the limitations that the data processing system comprises "...a section for setting a first data amount which can be continuously transferred by the at least one function module; [and] a section for suspending an output of the first bus use permission request signal to the arbitration controller for at least one clock cycle after a data transfer by the at least one function module is completed..."

These limitations distinguish the present invention from the prior art of record.

5. Claims 3-5 and 9-12 are considered allowable based on their dependency upon Claim 1.

6. In light of the Applicant's arguments filed on 12 September 2005, New Claim 13 is considered allowable, particularly due to the limitations that the data processing system comprises "... a first section for setting a first data amount which can be continuously transferred by the at least one function module; [and] a second section for selectively suspending an output of the first bus use permission request signal to the arbitration controller for at least one clock cycle after a data transfer by the at least one function module is completed..." These limitations distinguish the present invention from the prior art of record.

7. Claims 7-8 are considered allowable based on their dependency upon Claim 13.

8. In light of the Applicant's arguments filed on 12 September 2005, New Claim 14 is considered allowable, particularly due to the limitations that the method of processing data comprises the steps of "...setting a first data amount which can be continuously transferred by the at least one function module; [and] suspending the first bus use permission request signal to the arbitration controller for at least one clock cycle after a data transfer by the at least one function module is completed..." These limitations distinguish the present invention from the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
